

# Dark Web Scan.

The Dark Web is an encrypted part of the internet only accessible through a Tor browser. It is home to a lot of illegal activities and Cyber Criminals use the Dark Web as a marketplace to buy and trade stolen data, such as credentials. Our solution offers an extra layer of security for your organisation, making you aware of any leaks and sale of your credentials before any damage happens.

## Benefits

- Fully Managed
- Any Leak Becomes High Priority
- Protect Your Data
- Peace Of Mind - Full Visibility
- Receive Action Plans With Detected Leaks
- Manage Passwords & User Names More Efficiently

# Dark Web Scan.

## Why Get A Dark Web Scan?

Our Dark Web Scan solution allows you to stay on top of your organisations credentials, so you avoid unnecessary password resets. When a leak is detected, it becomes a high priority ticket, so you can be sure your security is always our priority!

## Why Partner With Redsquid?

Not once have we completed a scan, and not found an organisations credentials for sale! The Dark Web, is not at the forefront on people's mind, and we wish to take the worry away from you so you can continue operations and security and efficient as possible.
